

## EDITORIAL NOTES.

The autumn of 1938 saw the return of the Association to its old meeting place at the Medical Institute. It was thought by some that owing to the increase in the numbers attending many of the lectures, this room might become overcrowded, but a re-arrangement of the seats has solved this difficulty, and the absence of external noises has been much appreciated.

The lecture programme was particularly good. In addition to excellent lectures by our own members we were glad to welcome G. R. Speaker, Marco Pallis and Miss Brenda Ritchie.

A full series of outdoor meets in Wales, Cumberland and Derbyshire was arranged and these were very successful, despite some rather poor weather. A number of members were also in various mountain districts of Scotland.

Further afield, Dr. Sheldon was in the Lofoten Islands, Frank Solari in Harris and St. Kilda, and there was a large and successful Alpine meet at Saas Fee. In addition, small parties were in the Chamonix district and the Western Graians, and in the Albula and Engadine.
